

## AkyPure<sup>™</sup> Tray

## Transport Your Primary Packaging in Complete Safety

Comply with the cGMP production requirements

cGMP compliant trays with customised fittings, allowing the reduction of intermediate repackaging operations. The guarantee of perfect hygiene for your primary packaging.

AkyPure<sup>™</sup> Tray

# AkyPure<sup>™</sup> Tray

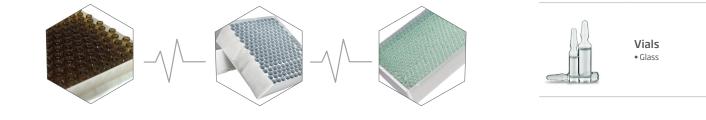

Characteristics		Benefits
100% polypropylene design	$\rightarrow$	Product that meets pharmaceutical requirements
Possible fittings with dividers	$\rightarrow$	Optimum protection for your fragile containers
Multiple configurations or sizes	$\rightarrow$	Easy to use and can be tailored to your production equipment
Anti-static	$\rightarrow$	Dust prevention
Deliverable flat or assembled	$\rightarrow$	Optimisation of your storage space and reduction of your carbon footprint

#### **Applications**

• Glass • Plastic

### **Business** Case

#### Our solution:

We worked in close collaboration to develop a PP packaging solution with customised interior fittings which was a perfect match for this laboratory's requirements.

Thanks to the AkyPure Tray solution, our customer has increased their productivity and has a completely hygienic and safe packaging at their disposal.

#### The customer's challenge:

A major player in the pharmaceutical industry was looking for a solution for transporting glass vials from the production site to the laboratory. The aim was to increase their productivity by cutting out the intermediate stages, while still adhering to the clean hygiene conditions in their production environment.

### **Expert Opinion**

**G** The close and strong relationships we maintain with the world's leading laboratories and primary packaging suppliers enable us to offer solutions which are a perfect fit with today's requirements and those of the future.

Pascal Schelcher, Market Segment Manager Pharma
