

# The wrong bins?

The increase in online shopping during Covid-19 is here to stay, putting already overflowing household bins under sustained pressure.

Nearly

## 2/3

of Brits whose recycling has increased blame it on more time spent at home...

...and nearly

## 1/2

say increased online shopping is making their recycling pile bigger.

But with

## 86%

set to shop online at the same rate or higher post-Covid, and

## 49%

already admitting to running out of space in their recycling bins and bags at times, something needs to change.

With

## 74%

of people worried about the environmental impact of excess waste, leading recycler DS Smith is calling for a better home recycling infrastructure to ensure everything that can be recycled is recycled.

Go to [www.dssmith.com/recycling](http://www.dssmith.com/recycling) to find out more.
