Your ideas, our solutions

A customised solution

The format or configuration which you need is not covered in the ranges of containers on offer. In this case, we will produce the container that is perfectly suited to your products and protection requirements.

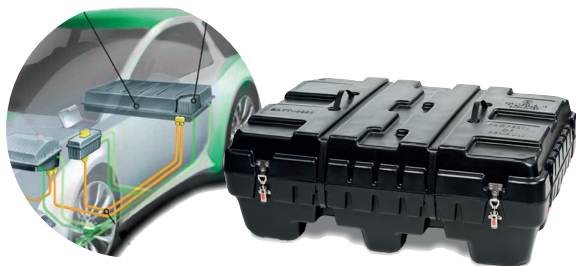

A solution developed from A to Z

Your product is special and you want the perfect container to transport it absolutely securely. We will develop an optimised solution for you which meets your specifications.

Innovation Battery Pack Development

In recent years, electric mobility has undergone an exponential increase. Automotive manufacturers have very quickly had to face issues of battery transportation and storage. Bespoke thermoformed packaging solutions in plastic have emerged as a light and strong alternative to facilitate transport while providing optimum protection if dropped.

Expert Opinion

Olivier Saada,
Product Manager Containers

“The AkyPak 4You concept has made it possible to develop, with our customers, a certified packaging solution for the transportation of hazardous materials which is fully customised, providing both lightness and fall protection. Fitted with straps, shims and fully moulded to the exact requirements according to each battery model, AkyPak 4You container solutions facilitate handling for operators.”
