JUMBO

250450	JUMBO CUBITAINER USA NATURAL/RED + 38mm RING USA WHITE		x (usa)	x	USA Cubitainer / Gland 201506 38mm	Screw- ring	
250655	JUMBO HEX 3/4" SHORT THREAD NATURAL + RED SPIGOT + WHITE WASHER	x			Containers	Screw-in	
250667	JUMBO HEX 3/4" LONG THREAD BLACK + BLACK SPIGOT + BLACK WASHER	x			Containers	Screw-in	
250660	JUMBO HEX 3/4" LONG THREAD NATURAL + RED SPIGOT + WT WASH+B/NUT (BAG OF 100 UNITS)	x			Containers	Screw-in	

Description: Easy-action lever taps with high flow rate, ideal for more viscous liquids, no air return.

Application: The easy-action lever taps, with a 18mm spigot bore, provide higher flow rates (296ml/s) than the 8 mm QST (72ml/sec). They are therefore ideal for more viscous liquids.

Recommended fitments : Cubitainers & Rigid containers & Flexible Bag In Box (with Gland 38mm 201506)

AEROFLOW

251204	AEROFLOW TAP 1.6 Pe NATURAL/RED		x		Containers	Push-in	
251205	AEROFLOW TAP 1.6 Pe NATURAL/WHITE		x		Containers	Push-in	
251804	AEROFLOW TAP Pe + 3/4" SHORT ADAPTOR + WHITE WASHER		x		Containers with a 3/4" BSP taper thread socket	Screw-in	

Description: Air returning lever tap designed for **single-opening containers, metal or plastic, from 5 up to 200 L.**

Application: **Excellent flow rate** of 70 ml/Sec when fully open, with the possibility to **control the dispense** by turning the lever accordingly. Gives an effortless, glue free dispense, with no hazard, no waste and no need for secondary venting.

Recommended fitments: **Larger, rigid, single-opening (non-vented) containers up to 200L**

252402	8mm CUBITAINER EURO NATURAL + STANDARD SPIGOT + 38mm SCREW RING EURO WHITE	x	(euro)		EURO Cubitainer	Screw-Ring	
255101	8mm QST 0.6 Pe NAT + STD SPIGOT WHITE	x			Containers	Push-in	
255830	8mm QST Pe NATURAL STD SPIGOT WHITE + 3/4" BSP SHORT THREAD + WHITE WASHER	x			rigid containers with a 3/4" BSP taper thread	Screw-in	
257803	12mm QST HD NATURAL + SPIGOT WHITE + 3/4" SHORT THREAD NATURAL+BLACK WASHER	x			rigid containers with a 3/4" BSP taper thread	Screw-in	

Description: Easy-action lever taps with a **8 mm spigot**. Suitable for **rigid, semi-rigid** (i.e. 'Cubitainer®') and **flexible** (i.e. bag-in-box) **containers**. Excellent flow rate: 72ml/sec (8mm) and 155ml/sec (12mm).

Application: Includes **Push-In, Screw-In and Screw-ring**: Push-in options include a barbed back end in 2 gauges typically used as follows: 1.4 mm for tap/cap assemblies and 0.6 mm - for bag-in-box. The Screw-in option consists of a 0.2 mm barbed back end fitted to a 3/4" BSP internally threaded adaptor. A range of Quick Serve Taps with Screw Rings and a 'lug Fitting' has been designed for Cubitainer®, and is available in 3 basic options to match the European, Japanese and American Cubitainer® necks.

Recommended fittings: **Cubitalners & Rigid containers & Flexible Bag In Box** (with Gland 38mm 201506)

SMOOTH FLOW

258007	12mm SMOOTHFLOW 1.6 NATURAL Pe+SPIGOT WT BLUE PLUG	x			Containers	Push-in	
258446	12mm SMOOTHFLOW Pe NAT/WHITE + BLUE PLUG + 38mm S/RING USA WTE + WASHER	x		x	Containers + Gland 201506 38mm	Screw-Ring	

Description: Compact, air-returning lever taps designed for small, single-opening containers (i.e. 3 - 10 L). Flow rate: 30ml/sec.

Application: With a divider moulded into the 12 mm spigot bore, the Smooth Flow separates the liquid and air streams ensuring the safe, convenient dispense of liquids without 'glug' from small blown bottles, jerry-cans or even glass demijohns. Available back end options include 1.4 mm barb, Plug-fit and Screw-Ring. The 1.4 mm barb is commonly used for cap/tap assemblies. The Plug-fit option can be used where a good internal neck finish can be assured, otherwise a Screw-Ring system (38 or 40 mm) incorporating a washer is more suitable.

Recommended fitments : Rigid containers & Gland 38mm 201506

2 " TAPS

352000	DRUM MAJOR	x			Bag-lined IBCs	Screw-in	
352001	2" STRAIGHT-THROUGH	x			Bag-lined IBCs	Screw-in	
200870	"2"" CUTTER ADAPTOR" WIRE SPARKED PIN 316 CRANKED	x			352000 drum major / 352001 straight through		

Description: Rugged, screw action vertical discharge or In-line option, ideal for bag-lined IBCs (2" Drum Major Tap; 2" straight-thru Tap). Hard-wearing 2" taps can be dismantled, cleaned and re-used for maximum convenience and cost-effectiveness.

Application: Many liquid foodstuffs inclusive dairy products, wine, juices, purees, liquid egg etc. and numerous chemicals and viscous liquids (such as adhesives, industrial and cleaning chemicals).

Back-end options

- 2" taps may be screwed directly into the 'Tri-Sure' type 2" BSP bung on steel drums
- Adaptors are available to allow fitting to 210/220 L Van Leer or Mauser type plastic drums
- NW50 adaptors allow fitting to rigid IBCs of the 'Schütz' type
- 2" BSP glands and Cutter Adaptors (which cut a hole as the tap is screwed into the gland) are available for use with externally welded or membraned glands on liner bags for IBCs

Recommended fitments : Large metal or plastic drums and liner bags for collapsible or returnable IBCs
