

## AkyPak™ Sleeve

### The heart of your protection system

Combined with a pallet and a cover, the **AkyPak Sleeve** is ideal for creating a lightweight and strong container.

Its excellent rigidity is provided by the **AkyBoard®** bubble structure polypropylene composition. Furthermore, the AkyPak Sleeve is resistant to mould and chemicals.

Fully foldable for a real saving in volume on return, it allows you to optimise storage and logistics, and to reduce your carbon footprint.

Want to enhance your brand image? The AkyPak Sleeve is customisable with flexographic or screen printing.

100%  
recyclable PP

Protection and  
safety

AkyPak Sleeve is produced from our AkyBoard® HR cellular polypropylene boards.

AkyBoard® Bubble Structure Board

- Light and easy to handle
- High bubble density for consistent rigidity
- Excellent surface finish
- Non-toxic and suitable for contact with food
- Resistant to chemicals
- Moisture-resistant and rot-proof
- 100% recyclable

Expert Opinion

Edouard Schmidt-Morgenroth,  
Production Manager - Extruded Products

“ Our sleeves are tested in the laboratory in particular to certify vertical compressive strength under static and dynamic loads. Our customers are assured of a solution approved by a recognised packaging specialist. ”
