

# The Sea Monster

## What you'll need:

1 x very large box for body

1 x large box for seaweed & tongue

2 x kitchen rolls

1 pair of scissors

Shredded tissue paper

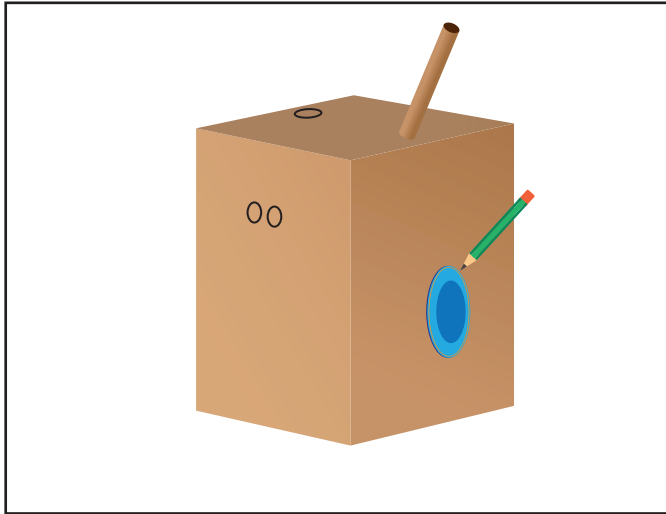

Things to decorate

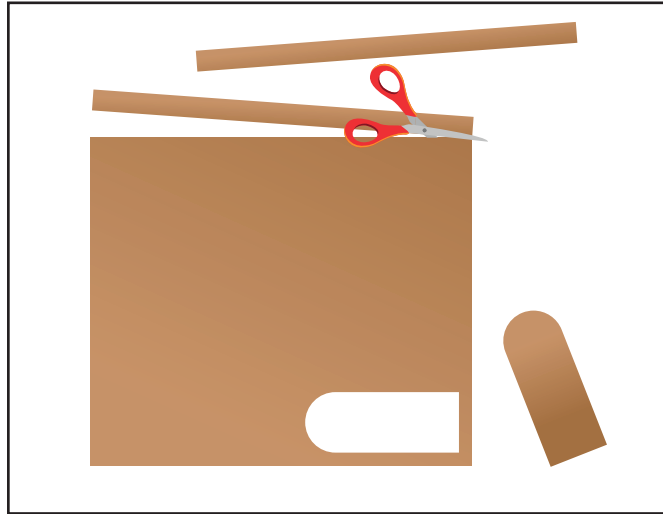

1 small bowl plate

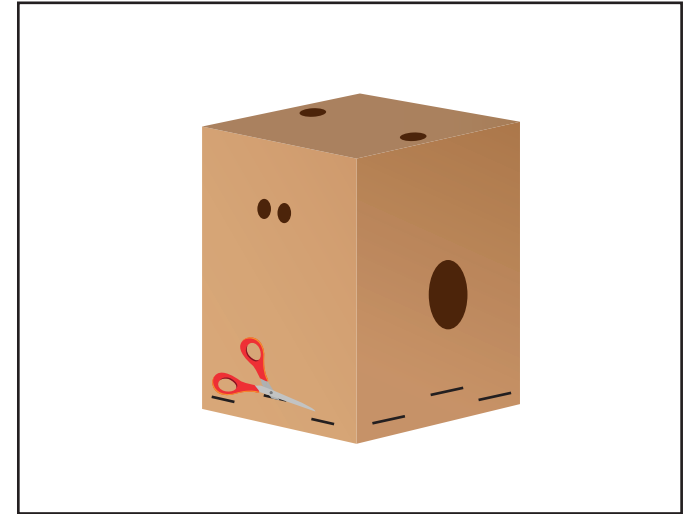

Try to keep use of paints, glues and crayons to a minimum. If using them, use child-friendly water-soluble options

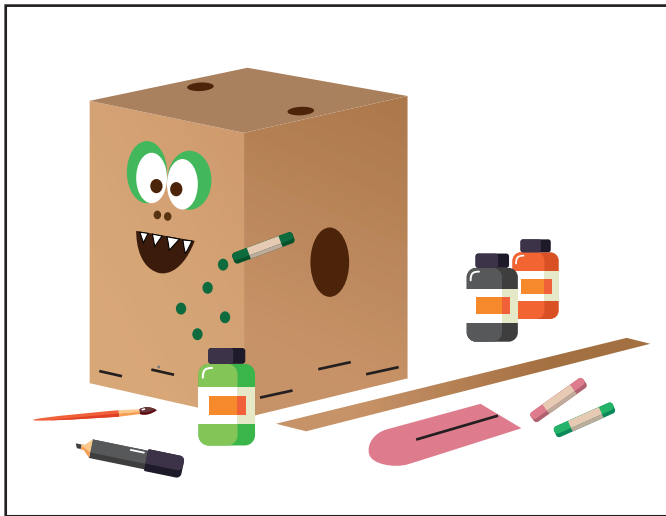

Start with the very large box. Draw round the small plate / bowl for the arm holes and around the kitchen roll for the ears and eye holes.

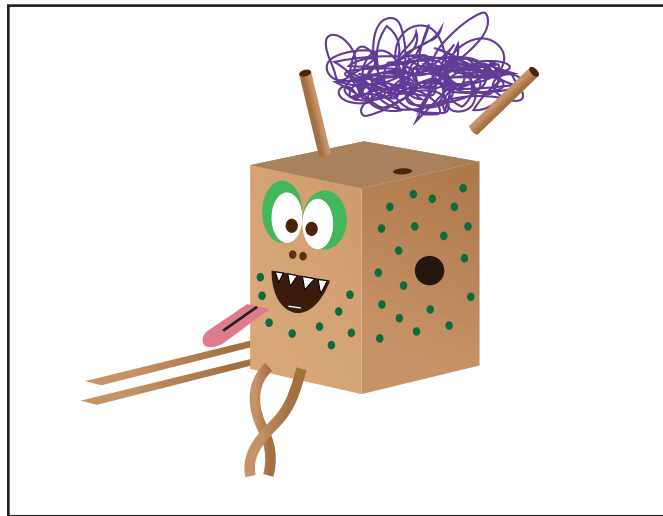

Next open up the large box and cut several strips for the seaweed and a tongue shape. Be careful with the scissors!

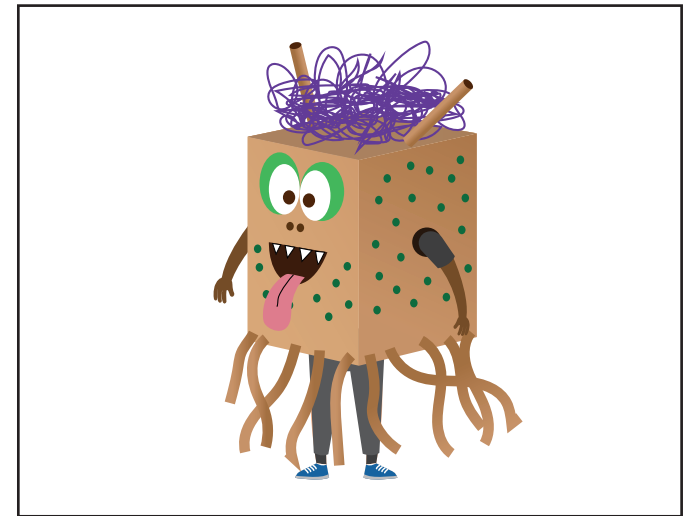

Now cut out the arms, eyes and ear holes, and make slits along the bottom for the seaweed.

Decorate the sea monster, tongue and seaweed however you want, but make sure it's super scary!

Push the seaweed into the slots and insert the kitchen rolls into the ear holes. Then make a slit for the tongue and push it in. Finally add the shredded tissue paper for hair.

Now pop the costume on but remember not to actually go into the sea as it's not very waterproof!
