Internal Layouts according to your requirements

Have your containers fitted so as to optimise storage of the parts being shipped, protect them and ensure their security: dividers, textiles, foams, plastic layer pads, etc. There is a DS Smith solution for all your requirements.

*Available over the whole AkyPak range

Expert Opinion

*José Declercq
Product Manager, Containers
Automotive, North Europe*

“ To deal with our customers’ issues around space saving, we have developed the AkyPak Classic range. This offers a wide range of possible dimensions to optimise filling of parts being shipped and provides an excellent return ratio. By choosing AkyPak Classic, our customers can be certain that they have opted for a quality product which has been recognised as such on the market for a number of years. ”
