Services

DS Smith offers a wide range of electronics services that can help you **optimising your supply chain, streamline your warehousing, improve product protection and reproducible** around the globe - all within a fast moving, challenging industry.

Case study: 5G Antenna packaging

Transport packaging for 80kg antenna

Paper profiles at the corners prepares the packaging to loaded up to 2.7m

Easy packing / unpacking provided by corrugated sleeve and plywood lid

Water barrier applied on the corrugated boards

Fabricated EPE fitments protect the antenna against vibration and shock during transportation
